

# Preregistration

Daan Ornée  
Charlotte Vrijen  
Yoram Kunkels

**PREREGISTERED**  
info@openscience-groningen.nl  
@OSCGroningen

Presentation from the Open Science Center: [cos.io/prereg](https://cos.io/prereg)

# Hypo-Deductive Model of the Scientific Method

# The Problem

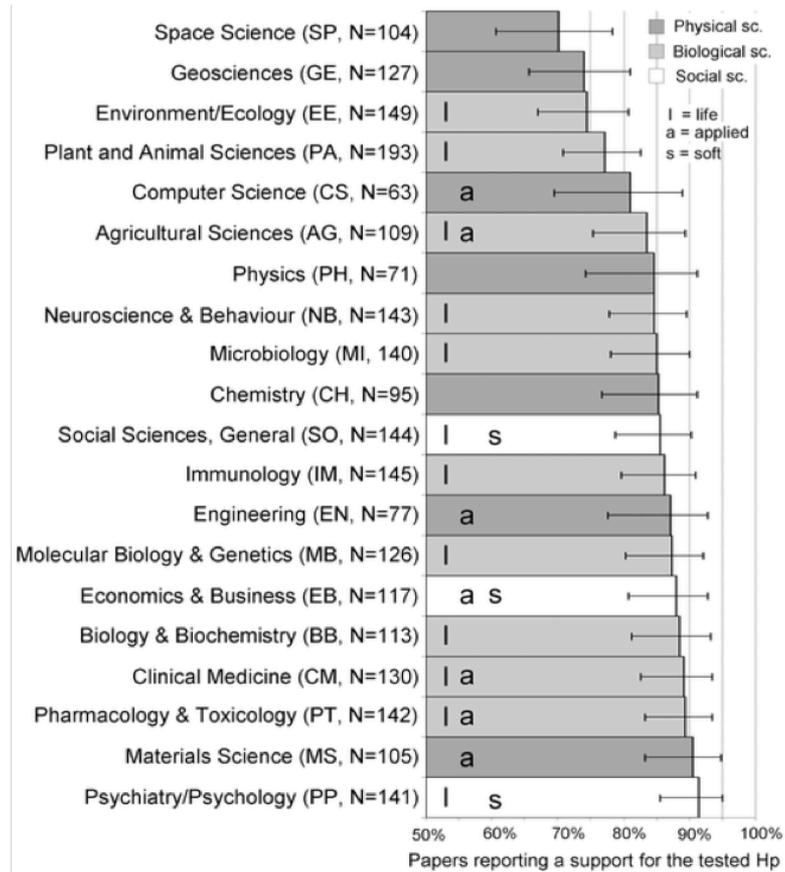

The combination of a strong bias toward statistically significant findings and flexibility in data analysis results can lead to irreproducible research

# The Problem

The combination of a **strong bias toward statistically significant findings** and flexibility in data analysis results can lead to irreproducible research

Fanelli D (2010) "Positive" Results Increase Down the Hierarchy of the Sciences. PLoS ONE 5(4): e10068. doi:10.1371/journal.pone.0010068

<http://127.0.0.1:8081/plosone/article?id=info:doi/10.1371/journal.pone.0010068>

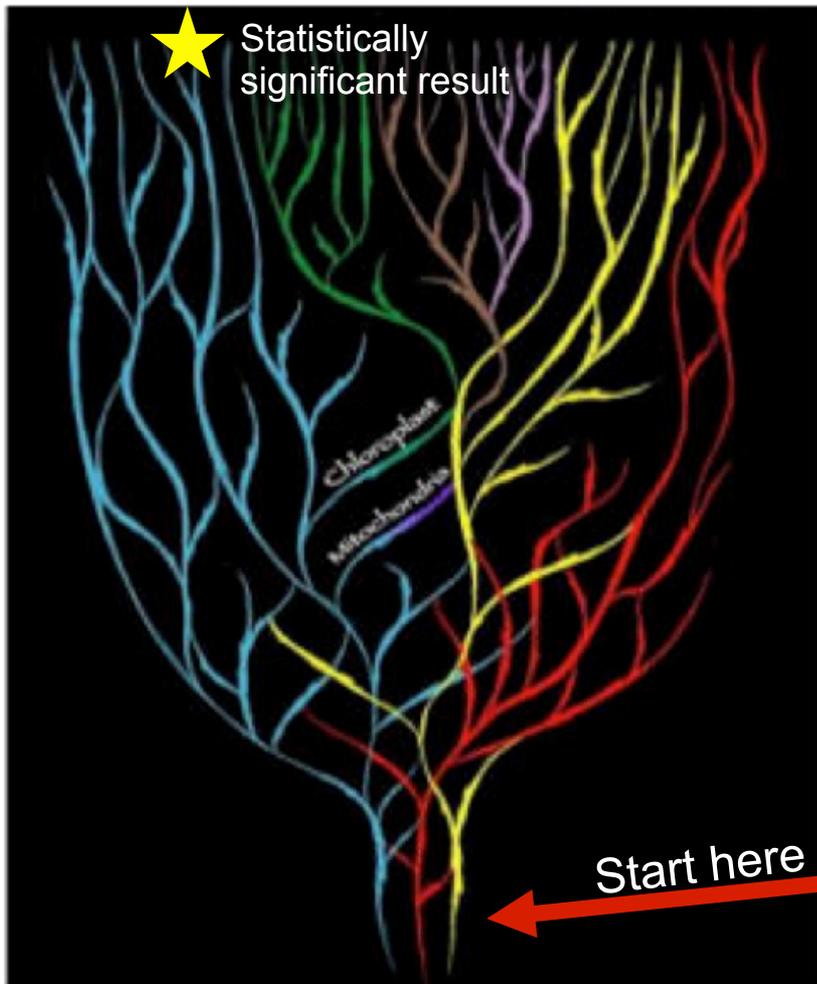

# The Problem

The combination of a strong bias toward statistically significant findings and **flexibility in data analysis** results can lead to irreproducible research

# The Garden of Forking Paths

Control for time?

Exclude outliers?

Median or mean?

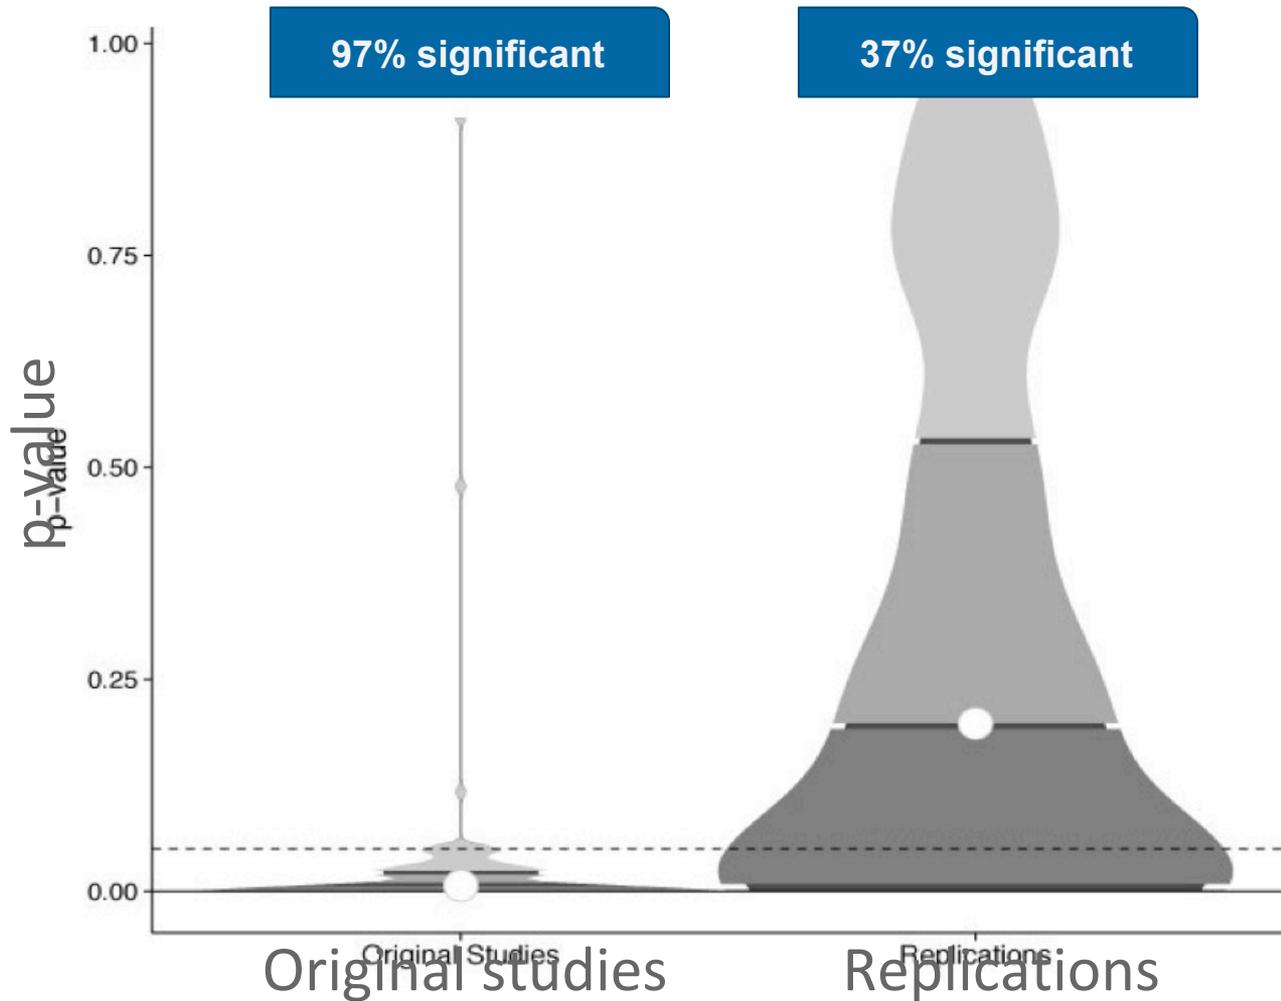

**Hypothesis: “Does X affect Y?”**

# The Problem

The combination of a strong bias toward statistically significant findings and flexibility in data analysis results can lead to **irreproducible research**

# Reproducibility Project: Psychology

# What is Preregistration?

# What is Preregistration?

A time-stamped, read-only version of your research plan created ***before*** you begin data collection.

# What is Preregistration?

A time-stamped, read-only version of your research plan created *before* you begin data collection.

## **It contains:**

- Hypothesis
- Data collection procedures
- Manipulated and measured variables
- Statistical model
- Inference criteria

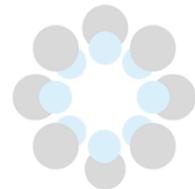

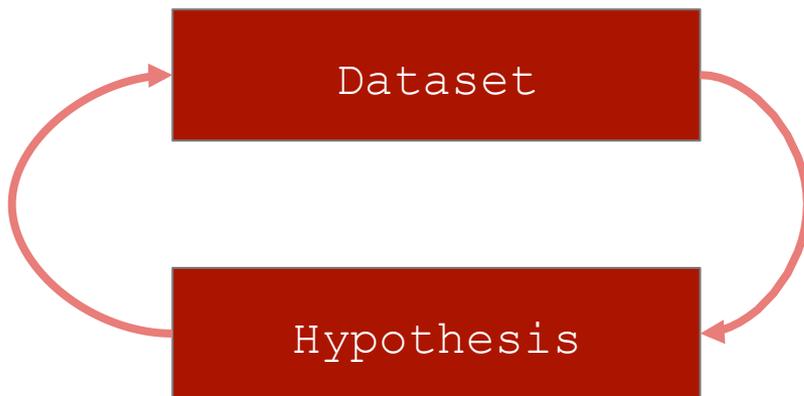

When the research plan undergoes **peer review before results are known**, the preregistration becomes part of a Registered Report

# What problems does preregistration fix?

1. The file drawer effect
2. **P-Hacking**: Unreported flexibility in data analysis
3. **HARKing**: Hypothesizing After Results are Known

# What problems does preregistration fix?

Preregistration makes the distinction between **confirmatory** (hypothesis testing) and **exploratory** (hypothesis generating) research more clear.

# Confirmatory vs. Exploratory Analysis

## Context of confirmation

- Traditional hypothesis testing
- Results held to the highest standards of rigor
- Goal is to minimize false positives

**P-values interpretable**

## Context of discovery

- Pushes knowledge into new areas/ data-led discovery
- Finds unexpected relationships
- Goal is to minimize false negatives

**P-values meaningless**

# Confirmatory vs. Exploratory Analysis

Presenting exploratory results as confirmatory increases the publishability of results **at the expense of credibility of results.**

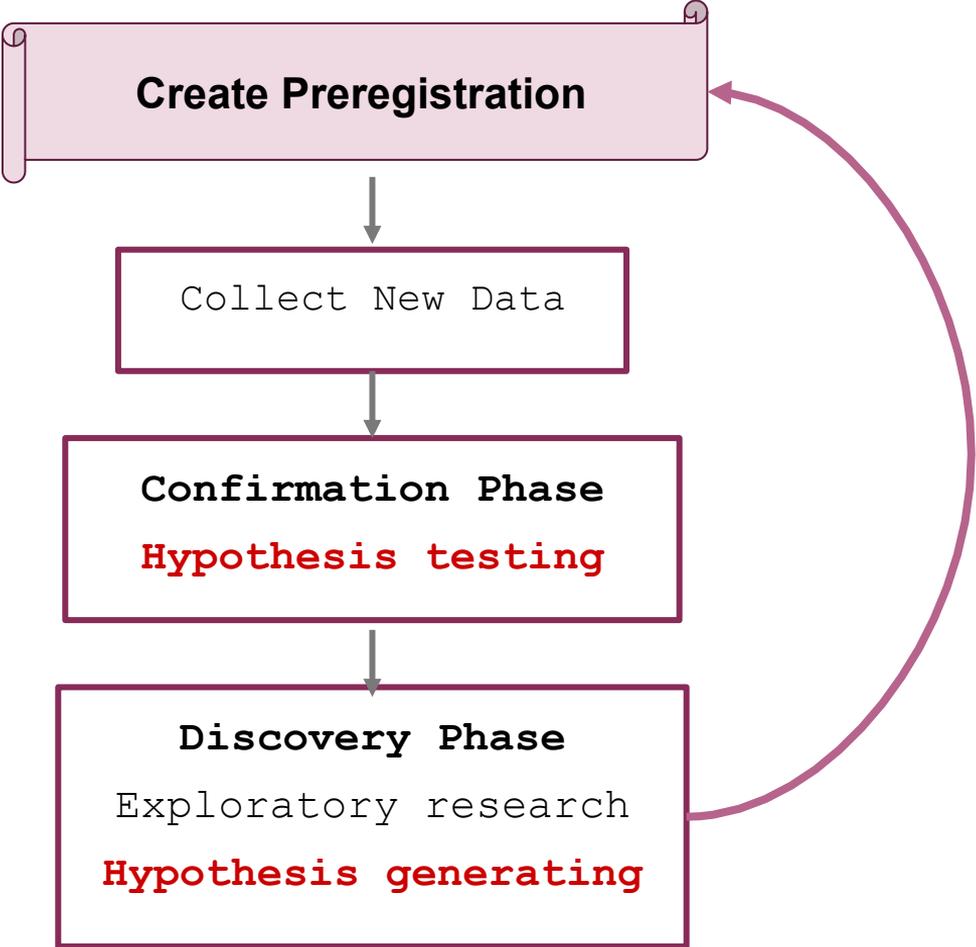

P-values interpretable

P-values meaningless

# Example workflow

Theory driven, a-priori expectations

# Incentives to Preregister

You can receive a **Preregistered Badge** for preregistering your research *before* you begin your study. Visit [cos.io/badges](https://cos.io/badges) for more information and to see which journals currently issue badges.

# Let's look at OSF form, real-time!

<http://osf.io/prereg/>

Examples of completed preregistrations:

<https://osf.io/e6auq/wiki/Example%20Preregistrations/?view>

# Different formats for different studies

- **Use of secondary data:** <https://osf.io/x4gzt/>
- **Qualitative Research:** <https://osf.io/dv8km/> or <https://osf.io/j7ghv/>
- **Experience sampling (ESM) studies:** <https://osf.io/2chmu/>
- **fMRI studies:** <https://osf.io/6juft/>
- **Systematic reviews and meta-analyses:**  
<https://osf.io/preprints/metaarxiv/3nbea>

Just some examples, there are many more

# Want help? OSCG Q&A

## Bi-monthly preregistration Q&A in 2021:

January 19, 13:00-14:00

March 1, 13:00-14:00

September 7, 13:00-14:00

November 8, 13:00-14:00

**PREREGISTERED**  
Please send an email to  
[info@openscience-groningen.nl](mailto:info@openscience-groningen.nl)  
to receive the google meet link

# Preregistration video tutorials

- Goal: offering information and step-by-step guides on pre-registration.
- Format: Short (5 to 10 minutes) video's disseminated online.

# Preregistration video tutorials

- Series: Looking at one major topic at a time and breaking it down into small, manageable chunks.
- Interactivity & relevancy: Easily skip to a part of video that is most relevant.

- Example:

[https://www.youtube.com/watch?v=O6IL\\_VcSfE4](https://www.youtube.com/watch?v=O6IL_VcSfE4)

# FAQs

# FAQs

Can't someone "scoop" my ideas?

# FAQs

Can't someone “scoop” my ideas?

1. Date-stamped preregistrations make your claim verifiable.
2. By the time you've preregistered, you are ahead of any possible scooper.
3. Embargo your preregistration.

# FAQs

Isn't it easy to cheat?

# FAQs

## Isn't it easy to cheat?

1. Making a “preregistration” after conducting the study.
2. Making multiple preregistrations and only citing the one that “worked.”

# FAQs

## Isn't it easy to cheat?

1. Making a “preregistration” after conducting the study.
2. Making multiple preregistrations and only citing the one that “worked.”

While fairly easy to do, this makes fraud **more intentional**.

Preregistration helps keep you honest to **yourself**.

# Tips for writing up preregistered work

1. Include a link to your preregistration (e.g. <https://osf.io/f45xp>)
2. Report the results of **ALL** preregistered analyses
3. **ANY** unregistered analyses must be transparent

# Thank you for attending!

1. POLL: Do you think you will attend one of the next Q&A sessions

# THANK YOU!
